The Kimberly Kim Foundation Inc., Assisted Communication Technology Grant Application

The Kimberly Kim Foundation, Inc., is a Georgia based 501(c)3 non-profit corporation dedicated to raising funds for the awareness, research and clinical treatment of Amyotrophic Lateral Sclerosis (ALS). The Foundation started the Assisted Communications Technology (ACT) Grant program to provide patients with ALS who have lost the ability to speak with an alternative means of communication. Recipients of ACT Grants from the Foundation will receive a SmartNav 4AT system. The SmartNav 4AT system from Natural Point® allows its users to completely control a computer through natural head movements and includes a virtual keyboard.

I have seen first-hand how beneficial the SmartNav 4AT system can be for ALS patients. My wife Kimberly was diagnosed with ALS in 2006 and the SmartNav technology has allowed her to effectively communicate with me and my son. The Smartnav has given Kimberly the ability to continue developing software code and even write and publish a book. For more information about Kimberly and her use of the SmartNav technology please visit www.kimkimfight.com. The Foundation is pleased that we can deliver this very useful technology to other ALS patients and give them an effective ergonomic mouse alternative and a means to communicate with those closest to them.

Eye Control Technologies, Inc. (d/b/a NaturalPoint) was founded in 1997 to develop computer control devices for people with disabilities. The Natural Point SmartNav™ system was launched by the company in order to provide the general public with an affordable alternative to the traditional mouse. Natural Point® is proud to partner with the Kimberly Kim Foundation, Inc., in providing ACT Grants to ALS patients. For more information about NaturalPoint or the SmartNav™ system please visit www.naturalpoint.com/smartnav.

The financial burden over the years of living with ALS is enormous. The Foundation will always search for ways such as the ACT Grant program to ease this burden for ALS patients and their families. For any questions about the Kimberly Kim Foundation ACT Grant or completing this application, please feel free to contact me.

Sincerely,

Jin H. Kim, Chairman
Kimberly Kim Foundation, Inc.
